VOLUNTARY RECALL NOTICE FOR THAMES & KOSMOS CHEM KITS

Special notice to retailers who have purchased Thames and Kosmos **CHEM C1000 AND GLOWING CHEMISTRY** kits. Phase 3 mistakenly left these items on our list for Thames 2020, when they are in fact restricted in Canada and should not be for sale. Health Canada is issuing a recall. These items do not have a bilingual warning statement to help consumers understand the contents of the kit, and what to do in case of emergency. See English and French warning labels:

WARNING. This set contains chemicals that may be harmful if misused. Read the information in the instruction manual. If splashed in the eyes, or on skin, flush thoroughly with water. Get medical attention immediately if splashed in eyes. Not to be used by children except under adult supervision. Not recommended for children under 12 years of age.

AVERTISSEMENT. Ce nécessaire contient des produits chimiques qui peuvent être nocifs s'ils sont mal utilisés. Lire les indications de la brochure d'instructions. En cas d'éclaboussures sur la peau ou dans les yeux, bien rincer à grande eau. Recourir immédiatement aux soins du médecin si les yeux ont été touchés. Ne doit pas être utilisé par des enfants qui ne sont pas sous la surveillance d'un adulte. Contre-indiqué pour les enfants de moins de 12 ans.

62 CHEM C1000 kits and 3 GLOWING CHEMISTRY kits were sold in Canada in 2020 before we noticed the error in the data. We offer our sincere apologies for this oversight. If you have received one of these kits during 2020, please remove it from your shelf and contact Phase 3 immediately for a credit. The kits should be destroyed. At any point in the future if a consumer returns this product to you, please credit them and let us know. You can destroy the product, or we can pick it up to be destroyed.
